

TUESDAY May 1st

MAP / Eagle Automotive of Bloomington

Designed for technicians with prior understanding of the refrigerant cycle and system operation, this seminar will provide technicians with techniques and strategies required to isolate the root cause and perform repairs of failures in R-134a and R-1234yf equipped Air Conditioning (AC) systems. The use of pressure-temperature and humidity readings as a diagnostic aide will be the foundation of the course. Specific component diagnosis includes variable displacement compressors, electrically driven compressors, expansion valves, Internal Heat Exchangers (IHX), enhanced evaporators and condensers. This course will include simulated diagnostic exercises to apply the principles learned.

Food provided at 5:30pm **Meeting starts at 6:00pm**

Location: 926 E Lincoln, Bloomington IL

Fax Your Reservations to 309-828-9511 by March 30th
