Since I clicked on Invoice/Credit# column header the list is now sorted by document #, with the invoices & credits are in date/document order.

Click anywhere between the "Doc Type—Doc Date columns" to select a line To select more than 1 line item to view/print, this works similar to Excel. Press & hold the Control button while clicking on the rows that you need to view/print copies of. Once you have selected the items you need, click on the **magnifying glass on the top row**

To select everything, click on the first item & then scroll down & press the **SHIFT** before clicking on the last line, this highlights everything, then click on the **magnifying glass (on Top Row)**
